***County Hwy 41 between State Hwy 30 and intersection with Bridge St.**

RE: Roxbury Water District
Water System Improvement Project

Dear Vega Mtn. Road Area Property Owner:

As you may know, the Town of Roxbury has been working on a water system improvement project.

Part of the project involves replacing an old, undersized water main on Vega Mtn. Rd. that connects the distribution system to the reservoir. In conjunction with the work, 3 existing valves at the intersection of NYS Rte. 30 will also be replaced. A new valve will also be installed on the main that feeds Crest Drive. The end result of the project will be to provide much more reliable control of the system and improved fire flows.

Preparatory work has already begun, and the bulk of the work should largely be complete by June 1. Final restoration work will likely be done over the summer.

As part of the work, there will be unavoidable times when the water system will need to be temporarily shut-down. If your water service will be affected, you will receive a separate notice in advance of the shut-down.

If you have any questions or concerns, please feel free to contact me:

Phone: 518-366-7880
